Identity Operators

Arithmetic Operators

Operator	Operation	Example
+	Addition	$X + Y$
-	Subtraction	$X - Y$
*	Multiplication	$X * Y$
/	Division	X / Y
%	Modulus	$X \% Y$
**	Exponentiation	$X ** Y$
//	Floor Division	$X // Y$

Operator	Example	Same as
=	X = 1	X = 1
+=	X += 2	X = X + 2
-=	X -= 3	X = X - 3
*=	X *= 4	X = X * 4
/=	X /= 5	X = X / 5
%=	X %= 6	X = X % 6
//=	X //= 7	X = X // 7
**=	X **= 8	X = X ** 8
&=	X &= 9	X = X & 9
=	X = 10	X = X 10
^=	X ^= 11	X = X ^ 11
>>=	X >>= 12	X = X >> 12
<<=	X <<= 13	X = X << 13

4

Bit-Wise Operators

5

Membership Operators

6

Identity Operators

Comparison Operators

Operator	Operation	Example
==	Equal	X == Y
!=	Not equal	X != Y
>	Greater than	X > Y
<	Less than	X < Y
>=	Greater than or equal to	X >= Y
<=	Less than or equal to	X <= Y

Contents

1

Arithmetic Operators

2

Comparison Operators

3

Logical Operators

4

Bit-Wise Operators

5

Membership Operators

6

Identity Operators

Logical Operators

Operator	Description	Example
and	Returns True if both statements are true	<code>x > 7 and x < 12</code>
or	Returns True if one of the statements is true	<code>x < 5 or x > 10</code>
not	Reverse the result, returns False if the result is true	<code>not(x > 7 and x < 12)</code>

Contents

Comparison Operators

3

Logical Operators

4

Bit-Wise Operators

5

Membership Operators

6

Identity Operators

Bit-Wise Operators

Operator	Operation	Example
&	AND	Sets each bit to 1 if both bits are 1
	OR	Sets each bit to 1 if one of two bits is 1
^	XOR	Sets each bit to 1 if only one of two bits is 1
~	NOT	Inverts all the bits
<<	Zero fill left shift	Shift left and left-most bit falls off
>>	Signed right shift	Shift right and right-most bit falls off

Comparison Operators

3

Logical Operators

4

Bit-Wise Operators

5

Membership Operators

6

Identity Operators

Membership Operators

Operator	Description	Example
in	Returns True if the value exists in the object	X in Y 23 in my_list
not in	Returns True if the value <u>does not</u> exist in the object	X not in Y "Hey" not in my_list

Contents

1

Arithmetic Operators

2

Comparison Operators

3

Logical Operators

4

Bit-Wise Operators

5

Membership Operators

6

Identity Operators

Membership Operators

Operator	Description	Example
is	Returns True if both variables are the same objects	A is B A is 23
is not	Returns True if variables <u>are not</u> the same objects	A is not B A is not 49

1. What does it mean, being the same object?
2. The difference between "==" and "is" ?

Let's see some examples...

Thanks!
